PROFESSIONAL SUMMARY

Software Professional with 1 year of hands-on experience in SAP BusinessObjects Data Services (SAP BODS), enterprise application support, production support, SQL data analysis, and ETL development within a large-scale enterprise environment. Experienced in investigating production issues, resolving application support tickets through ServiceNow, troubleshooting system failures, performing data validation and reconciliation, and collaborating with business users, functional consultants, and cross-functional technical teams to ensure timely issue resolution and successful project delivery.

Strong communication, analytical, documentation, and problem-solving skills with experience supporting business users, participating in User Acceptance Testing (UAT), monitoring production environments, and maintaining operational quality. Passionate about delivering excellent user support, learning AI-powered technologies, and contributing to fast-paced, customer-focused organizations. Quick learner, immediate joiner, and open to relocation across India.

TECHNICAL & PROFESSIONAL SKILLS

- **Enterprise Applications:** SAP BusinessObjects Data Services (SAP BODS 4.3), SAP ECC, SAP BW, SAP HANA, S/4HANA Migration Concepts
- **Data Analysis & Validation:** SQL, SQL Server, Data Analysis, Data Validation, Data Quality Analysis, Data Reconciliation, Data Transformation, Data Extraction
- **Production Support & Investigation:** Production Support, Incident Investigation, Root Cause Analysis, Log Analysis, ServiceNow Ticket Management, User Acceptance Testing (UAT)
- **Documentation & Reporting:** Technical Documentation, Validation Reports, Source-to-Target Mapping, Test Case Preparation, Report Writing, Process Documentation
- **Professional Skills:** Analytical Thinking, Attention to Detail, Problem Solving, Critical Thinking, Stakeholder Communication, Cross-functional Collaboration, Time Management, Team Collaboration, Confidentiality, Organizational Skills
- **Tools:** Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Git, GitHub, Docker (Basic)

PROFESSIONAL EXPERIENCE

Software Engineer | VHS Consulting India Pvt Ltd

Client: TCS | **Project:** Grainger

March 2022 – February 2023

Project Environment: SAP BODS 4.3 | SAP ECC | SAP BW | SAP HANA | SAP S/4HANA | SQL Server | ServiceNow

Key Responsibilities:

ETL Development & Enterprise Data Integration

- Designed, developed, and maintained ETL workflows using SAP BusinessObjects Data Services (SAP BODS 4.3) for enterprise data integration and migration activities.
- Developed and maintained SAP BODS Jobs, Workflows, Data Flows, and Data Stores to support business data processing requirements.
- Built transformation logic using Query, SQL, Validation, Merge, Table Comparison, and Case Transformations.
- Worked on Slowly Changing Dimension (SCD Type 1 & Type 2) concepts to maintain historical data consistency.

Data Migration & Processing

- Extracted enterprise data from SAP ECC using SAP tables, IDoc interfaces, and BAPI integrations.
- Integrated data from Excel, XML, SQL Server, and flat-file sources into ETL workflows.
- Supported SAP S/4HANA migration activities through data extraction, transformation, and validation.

Data Validation & Quality Assurance

- Performed source-to-target validation and reconciliation to ensure data accuracy.
- Developed SQL queries for validation, duplicate identification, reconciliation, aggregation, and troubleshooting.
- Conducted data quality analysis before production deployment.

Production Support & Monitoring

- Monitored SAP BODS jobs using Data Services Management Console.
- Investigated ETL job failures through log analysis and troubleshooting.
- Supported SAP BW Process Chain monitoring and production activities.
- Managed and resolved production support tickets using ServiceNow while coordinating with technical teams.
- Ensured timely resolution of issues while maintaining data quality and project timelines.

Collaboration & Documentation

- Collaborated with business users, functional consultants, and technical teams during project execution.
- Participated in requirement discussions, project status meetings, and knowledge-sharing sessions.
- Supported User Acceptance Testing (UAT) by validating business requirements and documenting observations.
- Prepared Source-to-Target Mapping documents, validation reports, technical documentation, and test cases.
- Maintained project documentation to support successful delivery of enterprise solutions.

TECHNICAL PROJECTS

AnsiQ — Intelligent Agent Orchestration Framework

GitHub: [AnsiQ](#)

- Designed and developed an AI agent orchestration framework to automate complex workflows via multi-agent coordination and intelligent task execution.
- Designed and explored multi-agent architecture patterns, including sequential pipelines, event-driven workflows, and dependency-based orchestration.
- Integrated LLM-based application logic with multi-provider support, enabling flexible model interaction and efficient task processing.
- Implemented memory management concepts, including contextual retrieval and episodic memory, to enhance agent continuity.

- Explored modular framework architecture that supports intelligent tool integration & automation.

Qode Sync — AI-Assisted Repository Automation Platform

GitHub: [Qode-Sync](#)

- Implemented GitHub integration patterns, including repository management workflows, automation pipelines, and system integrations.
- Designed application architecture concepts, incorporating secure authentication, robust database interactions, and efficient workflow processing.
- Utilized AI-assisted development techniques to prototype features, conduct deep workflow analysis, debug application logic, and improve overall system functionality.

EDUCATION

Bachelor of Technology (B. Tech) – Electronics and Communication Engineering

Jawaharlal Nehru Technological University Kakinada (JNTUK) | 2019

ADDITIONAL INFORMATION

Availability: Immediate Joiner

Relocation: Open to relocate across India

Languages: English, Hindi, Telugu
